

Tool to Help You Match Your Skills to a Job's Requirements

Telecommunications employers want solutions to their particular issues. Position yourself as that solution and odds are an employer will choose you over another candidate.

Look at the technical skill requirements for the Field Services Technician job below. Then think about how you might use your experience to fill it.

This same thinking can be applied to any job. What's important is to consider how you match up. Then - tell your story.

Field Services Technician
